Source code dan penjelasan:

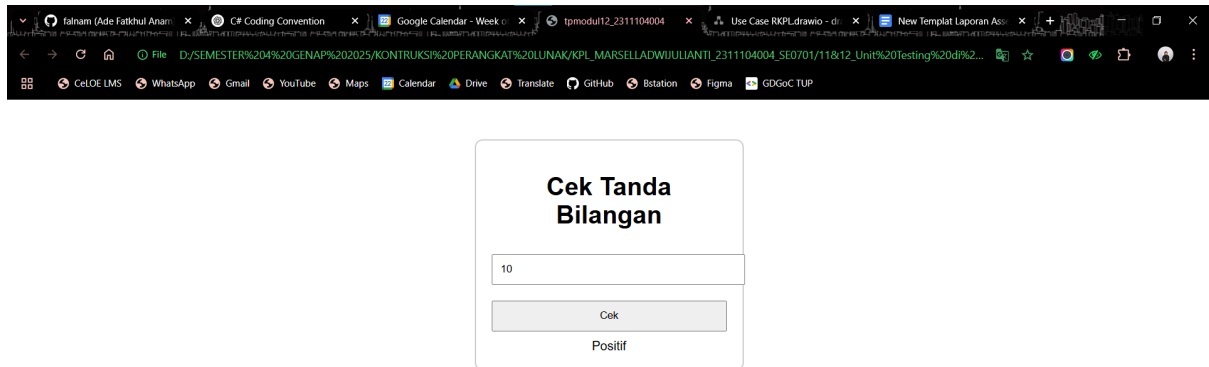

```
1 <!DOCTYPE html>
2 <html lang="en">
3 <head>
4   <meta charset="UTF-8">
5   <title>tpmodul12_1234567890</title>
6   <link rel="stylesheet" href="style.css">
7 </head>
8 <body>
9   <div class="container">
10    <h1>Cek Tanda Bilangan</h1>
11    <input type="number" id="inputBilangan" placeholder="Masukkan angka">
12    <button onclick="cekBilangan()">Cek</button>
13    <label id="hasilOutput"></label>
14  </div>
```

Pada kode diatas terdapat `input type="number"` → Tempat user mengisi angka, `button onclick="cekTanda()"` → Saat tombol diklik, fungsi `cekTanda()` dipanggil, `<p id="hasilOutput">` → Tempat menampilkan hasil (Positif, Nol, Negatif)

```
1 function CariTandaBilangan(a) {
2   if (a < 0) return "Negatif";
3   if (a > 0) return "Positif";
4   return "Nol";
5 }
6
7 function cekBilangan() {
8   const input = document.getElementById("inputBilangan").value;
9   const hasil = CariTandaBilangan(parseInt(input));
10  document.getElementById("hasilOutput").innerText = hasil;
11 }
```

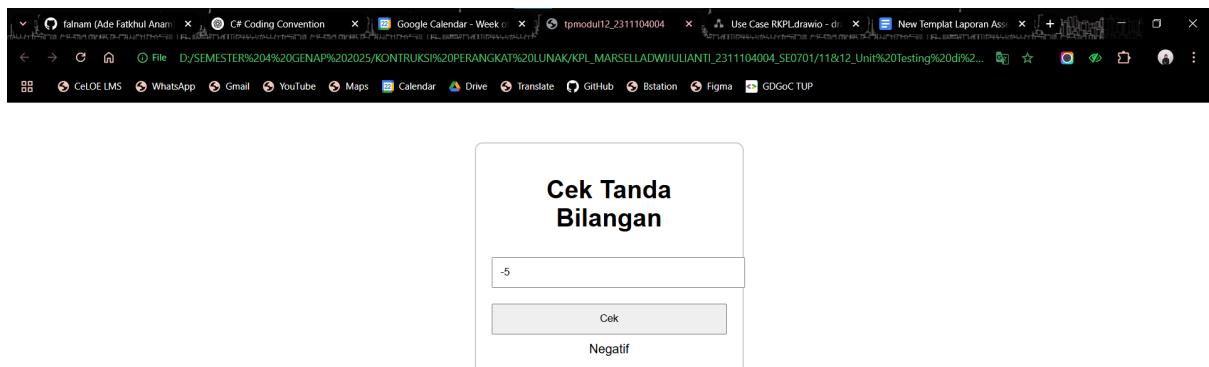

Pada kode diatas terdapat `CariTandaBilangan(a)` berfungsi untuk menentukan apakah a Negatif, Positif, atau Nol. Lalu `cekTanda()` untuk mengambil input dari textbox, lalu Convert ke int dan panggil fungsi `CariTandaBilangan`. Lalu tampilkan hasil di `<p id="hasilOutput">`

Output:

The screenshot shows a web browser window with multiple tabs. The active tab displays a form titled "Cek Tanda Bilangan". The form has a text input field containing the number "10". Below the input field is a button labeled "Cek". Underneath the button, the word "Positif" is displayed, indicating the result of the check.

Gambar diatas merupakan hasil Positif . Fungsi cekTanda() mengambil input → 10. Dan Fungsi CariTandaBilangan(-5) dijalankan → return "Positif"

The screenshot shows a web browser window with multiple tabs. The active tab displays a form titled "Cek Tanda Bilangan". The form has a text input field containing the number "-5". Below the input field is a button labeled "Cek". Underneath the button, the word "Negatif" is displayed, indicating the result of the check.

Gambar diatas merupakan hasil Negatif. Fungsi cekTanda() mengambil input → -5. Dan Fungsi CariTandaBilangan(-5) dijalankan → return "Negatif"
